Pana-Max2 EVOLUTION OF PANA-MAX

Pana-Max2 offers much more endurance and power than previous models, while being just as easy to handle. Its sleek design provides maximum visibility of the operating field, easily reaching all areas of the oral cavity.

Unsurpassed Durability

Built to excel in clinical situations. Featuring a scratch-resistant stainless steel body and sturdier turbine head.

Thanks to its uniquely designed shock-resistant head design, Pana-Max2's turbine rotor won't get damaged even if dropped

Exceptional longevity.

Newly designed bearing (h) structure with greater wear resistants and extended lifespan.

Solid stainless steel construction allows it to easily withstand continuous autoclaving and thermo-disinfection.

30% Power Boost

Pana-Max2 Conventional model

Pana-Max2 is dramatically more powerful than its predecessors thanks to the combination of NSK's air turbine simulation technologies. Rated at a maximum of 20 watts, this new model boasts the highest power rating in its class. That concentrated power, along with the bur's high rotational accuracy, creates a synergistic effect that ensures fast, precise treatments.

Slim-Line Stainless Steel Body

CEED

Pana-Max2's slim-line body guarantees excellent accessibility to the entire oral cavity. As a result visibility of the treatment area is maximized, allowing you to work with total efficiency.

Easy-to-change cartridges

Pana-Max2 cartridges are long lasting and easy to change, helping you to control cost and minimize downtime. Once the cartridge is changed the instrument is as good as new.

NSK Ultra Push Chuck

Pana. Max PTL MADE MUAPHN 00100004

NSK's Ultra Push Chuck allows easy bur change. The auto-lock mechanism ensures the bur stays in place even when higher torque loads are applied during cutting procedures.

Single Spray

NSK's single water spray ensures that the bur and operating field keep cool during cutting.
